Attended	Judy Walrath	Division of Public Health

Old and New Business

Welcome

Dr. Hassink called the meeting to order.

Approval of Meeting Minutes

Members of the Council on Health Promotion and Disease Prevention approved the minutes from the March 15th meeting.

Concept Mapping

Ms. Mary Kane stated that the 780 statements were submitted during the brainstorming process. Concept Systems, Inc. (CSI) then worked with a small group consisting of Dr. Hassink and staff from the Division of Public Health to eliminate redundancies and ensure an adequate representation of ideas. Ms. Kane informed the Council that this resulted in a final set of 120 unique ideas.

Ms. Kane stated that the members of the Council and other individuals identified based on their interest and expertise will be invited to sort the results of the brainstorming session into conceptually similar piles or themes. Ms. Kane gave the members of the Council instructions for completing the web-based sorting

phase. She told the group that the sort should take about an hour. It can be completed in one sitting or they can save their work and come back to it.

Ms. Kane stated that the invitations to sort and rate would go out following the meeting. Ms. Kane then distributed paper copies of the rating record sheet. She asked the members of the Council to rate the 120 ideas based on importance and feasibility.

The members of the Council spent 45 minutes completing the rating record sheet. Once the rating record sheets were completed they were submitted them to Ms. Kane.

Burden Report

Ms. Judy Walrath presented a draft outline for the CHPDP's Burden Report. She stated that based on her review of other burden reports she suggested including the following sections in the report: introduction, characterization of burden, risk factors, chronic disease, healthcare costs and second and tertiary prevention sections. Ms. Walrath went on to explain what information she planned on including in each of the aforementioned sections.

Secretary Rita Landgraf asked if the health disparities highlighted in the report would include mental health disparities. Secretary Landgraf stated that she has seen an increase in barriers to care among people with mental illnesses. Ms. Walrath stated that she would try to locate data on health disparities for people with mental illnesses in Delaware.

Ms. Walrath emphasized that the report would have a positive focus highlighting impact on quality of life, productivity, resources and cost savings. Ms. Walrath also provided the council with suggestions for a list of location specific resources for children, adults and families that would be included as a part of an asset map. Dr. Patricia Hoge suggested adding a list of smoke free properties to the asset map.

Ms. Walrath stated that the asset map, and council's recommendations could become part of the burden report or function as separate stand alone documents. Ms. Walrath concluded by stating that the multiple factors that include well being and healthy development of people and communities would be included in the document.

Public Comment

Ms. Deanna Rolland spoke to the members of CHPDP on behalf of the the Delaware Dietetic Association . Ms. Rolland stated that the DDA is excited about the positive health changes that can be brought about by the efforts of the CHPDP.

Ms. Rolland expressed the DDA commitment to the work of the CHPDP. She discussed dietitian's unique view of the current state of obesity and chronic disease in Delaware, and she asked the Council include dietitians in the planning process. Ms. Rolland stated that the DDA is interested in being part of the solution to increase awareness of preventative health measures.

The comments submitted by the DDA can be found on the CHPDP website:
